

Mission Accomplished. 🚀

Welcome to the most beautiful PDF viewer you've ever used.

You are looking at a standard PDF file. But unlike before, it isn't clunky, it isn't slow, and it actually looks good.

Three things you can do right now:

1. **Celebrate.** You never have to use boring PDF viewers again.
2. **Explore.** Take a look around the interface. We designed it to get out of your way.
3. **Forget it.** You're all set. The viewer is fully active; your only job now is to browse the web as usual.

Thanks for the trust,

Alfred Justus
